

DIGITAL INVOICING

Efficient and paperless invoicing (incoming & outgoing)

Wetac Battery Company is committed to sustainability and wants to make a positive contribution to the environment. Steps towards digitalizing are taken on both the incoming and outgoing payments. Less paper = always better for our environment.

Beside the positive contribution to the environment, we want to guarantee the safety of our customers and suppliers through every step of the process and protect their financial data in a secure environment.

At the end of 2016, Wetac Battery Company requested all its customers to agree on digital invoicing. The regulations in accordance to GDPR were followed in this process and since then, every new customer is explicitly asked if they agree on digital invoicing. If yes, they have to give a written consent for it.

Since 2018 we started processing the incoming invoices in an e-mail digital program (Elvy). Safe, reliable and insightful!

WHY CHOOSE DIGITAL INVOICING?

Reduction of costs for handling / delivery

Paperless administration, less harmful for the environment

Secure: a digital invoice can't get lost or send to a wrong receiver

Direct access to finance, monitoring of outgoing and incoming payments

Fast, easy and correct handling of invoices, both incoming and outgoing

Do you have ideas to further expand our sustainability program? Please don't hesitate and let us know!

Every employee involved has received an explanation regarding the digital invoicing procedure (both incoming & outgoing). A manual for this system can be found in the Elvy system itself, the complete manual can be found in print at the Accounting Department.
