Co2 calculation 2020

WETAC Co2 calculation 2020

Document source F:\Wetac\CSR\Internal Audit Wetac\CO2

In total we have less Co2 in comparison to 2019 (2019: 271.15 ton). This reduction is mainly caused by the Covid -19 virus. This year there is a large drop in fuel consumption and business flights because of the strict regulations in company visits caused by the virus.

Emission of gas and electricity have increased, due to the fact that all the companies under the Wetac-Group are now included in the measurement.

Energy		
Gas usage 'green'	25.749,00m ³	10,30 tons CO _{2e}
Electricity usage 'green'	122.634,00kWh	0,00 tons CO _{2e}
Automotive		
Total fuel consumption 'Gasoline'	3.425,00l	9,59 tons CO _{2e}
Total fuel consumption 'Diesel'	28.308,00l	91,49 tons CO _{2e}
Total fuel consumption 'Hybride'	5.262,00l	14,73 tons CO _{2e}
Number of cars in fleet	25	
Flights		
Number of return flights to zone 1	1	0,95 tons CO _{2e}
Number of return flights to zone 1	2	8,36 tons CO _{2e}
Paper usage		
Recycled paper	3.052,00kg	3,36 tons CO _{2e}
Printed paper, such as catalogues	300kg	0,48 tons CO _{2e}
Default numbers		
Number of employees	50FTE	
Total		139,26 ton CO_{2e}

Wetac Average Co2 per employee: 2.79 tons
